

# Your Partner for Making Communities Bloom

**Beautiful streets and  
sidewalks that require  
less water and less work.**

**HANGING PLANT CONTAINER**

The H2O Labour-Saver hanging basket uses up to **50% less water**, saving your community on watering and labour costs. Flowers are planted in the removable liner and roots draw water from the large reservoir below.

## The Weekender BASKET

Built with the same benefits as the H2O Labour-Saver, but with a smaller design, the Weekender hanging basket is ideal for public patios and other smaller spaces.

## Wrap-Around Containers:

**The Right Pot for the Right Spot!**

### H2O Basket

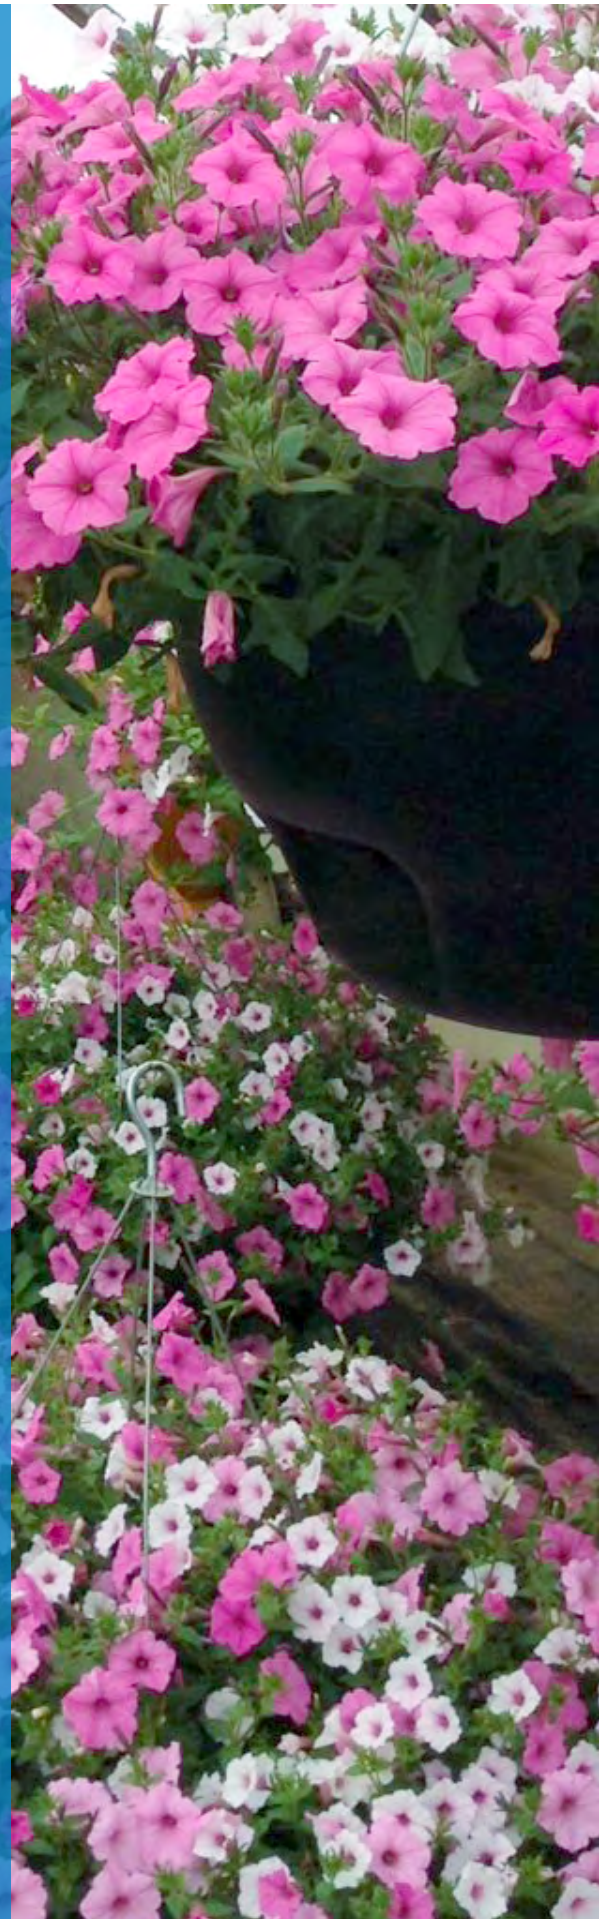

- 23" basket with heavy duty hanger
- Large water reservoir (9.3L | 2.46 gallon)
- Compact design uses less growing space in the greenhouse
- Overflow feature and wicking system prevents over watering and rot
- Made of recyclable HMWPE plastic with UV protection
- Lightweight transport - reservoirs can be filled at final location
- Removable plant liner
- Planted weight with soil, water, plants = 27-34 kg | 60-75 lbs

### Weekender Basket

- Same benefits as the H2O basket, smaller design
- 3.79 L | 1 gallon water reservoir
- Four colours available

### Wrap-Around Container

- 28" diameter
- Large water reservoir (9.8 L | 2.6 gallon)
- Removable plant liner holds 24 L | 6.4 gallons
- Two overflow drains per side
- Wrap-around bracket or onion basket required

# Simple Solutions to Help You Grow

## Al's Flower POUCH™ the original

### So beautiful, so simple.

A cost-effective solution to make every corner of your community bloom. The original Al's Flower Pouch™ is easy-to-plant and hangs on fences, hooks and posts. Plus the sale of every pouch supports the Brain Tumour Foundation of Canada.

### Al's Flower Pouch™

- Choose 4L, 5L or 6L pouches
- Choose the number of holes best suited to your growing needs
- Pair with the Thirst Quencher watering spout for easy, even watering

### Ellepots by A.M.A.

- Choose Ellepot size, tray and mix combination
- Fast, healthy root development
- Easy transplant
- Better take rates
- Reduced mortality rates
- Maximum air flow in the media
- Sustainable
- Lower labour cost

### Better propagation, Less plastics.

Support sustainable propagation with Ellepots by A.M.A. They promote faster, healthier rooting and reduce your labour costs. Manufactured at A.M.A., they're ready to plant when they arrive at your greenhouse.
